

# Core Values Exercise

A Core Value is a positive, predictable behavior pattern.

It is the preference or choice congregational members can be expected to make, spontaneously or daringly, in daily living.

A Core Value is the standard of behavior we strive earnestly to achieve, and for which we hold each other accountable.

If we fail, we feel very sad, and do everything in our power to correct our error as soon as possible.

A core value is an action with a measureable outcome. It is a verb, not a noun.

Define the action with a few descriptive words that make it clear what should result.
